Signs your child may need speech and language therapy:

- Does not say any words by the age of 1
- Has trouble interacting with peers
- Cannot follow simple directions
- Has speech that is difficult to understand
- Has frequent ear infections
- Has a diagnosed hearing loss
- Has a diagnosis of autism or another developmental delay

I am currently offering FREE speech and language screenings at your school. Please reach out to me with any questions. Sign the form below and return it to your school director to schedule your child's screening now!

About me:

I am a local mom with two young children. I am excited to offer my services as a Speech-Language Pathologist to the families at your school. Since graduating from New York University with a master's degree in 2009, I have worked in a variety of pediatric settings including private practices, clinics and schools. The children I treat are diagnosed with a wide range of receptive and expressive language delays, apraxia, pragmatic/social disorders, articulation impairment, hearing impairment and autism spectrum disorders. I am passionate about making a positive difference in the lives of the children that I work with through engaging and beneficial therapy techniques.

I, _____, give consent for my child _____,
age ____ to be seen by Diana Allen, M.A., CCC-SLP for a speech &
language screening. Please contact me at (_____) - ____ - ____.
